FEDERAL COMMUNICATIONS COMMISSION

Washington, D.C. 20554

RECEIVED

FEB - 1 1999

In The Matter of)
Amendment of Section 73.202(b),)
Table of Allotments,)
FM Broadcast Stations)
(North Tunica, Mississippi))

MM Docket _____

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

RM _____

To:

Chief, Allocations Branch
Policy and Rules Division
Mass Media Bureau

PETITION FOR RULE MAKING

Fred R. Flinn, Individually ("FLINN"), hereby petitions the Commission to institute a Notice of Proposed Rule Making (NPRM) for the allocation of channel 254A to North Tunica, Mississippi, as that Community's first FM broadcast service. FLINN gives the required verifications and also certifies that if the Commission allocates the channel, he, or an entity in which he participates, will file an application for construction permit.

CHANNEL 254A AT NORTH TUNICA QUALIFICATIONS

As shown by the attached channel study (Exhibit E, figure 1) channel 254A, when allocated to North Tunica, appears to have no short spacing to any known licensed facilities, proposed minor changes or proposed rule makings. It also appears that the nearest short spacing concerns are as follows: WZLQ(FM), (channel 253C1) Tupelo, Mississippi,

No. of Copies rec'd 014
List ABCDE

M M B

at 114.5°(Degrees) True; KTMO.L(FM) (channel 255C), Kennett, Missouri, at 8.8°(Degrees) True and WSRR, (channel 251C1), Millington, Tennessee at 45.2°(Degrees) True. The intersecting of these minimum distance separation contours create the location area for a fully spaced antenna site for channel 254A at North Tunica.

Exhibit E, figure 2 is an attached map which shows the fully spaced site chosen for the instant rule making would cover 100% of the proposed census designated place (North Tunica) of license with a hypothetical 70 dBu F(50,50) contour. The distance shown for a class A facility (6 kW, 100 meters HAAT) is 16.2 kilometers (10.1 miles).

Exhibit E, figure 3 depicts the window available for the allocation of channel 254A to North Tunica. This shows that FLINN's proposed coordinates do not short-space any existing stations, construction permits, applications, or allocations.

No FAA problems are anticipated. FLINN is aware of structures being planned in the immediate area of the allotment reference coordinates which could be used. In addition, there are existing structure in excess of 300 feet AGL at a fully spaced reference site under Section 73.215. If the Commission allocates channel 254A to North Tunica as that community's first local aural service, antenna sites in the immediate area of the FLINN reference coordinates will be available without FAA obstruction concerns.

NORTH TUNICA, MISSISSIPPI

North Tunica is located in Tunica County, Mississippi, and is a census designated place ("CDP") so declared by the US Census Bureau. It has long been a policy of the Allocations Branch to allot channels to a CDP if it was an area established by the US Census Bureau, i.e. Fort Rucker, Alabama, Fort Campbell, Kentucky. In addition, communities of license are made with less population than North Tunica, i.e. Orrville, Alabama (234 persons) and Gluckstadt, Mississippi (not listed as a community by the Census Bureau as a CDP nor by the State of Mississippi as an incorporated community) and ; source US Census Bureau @ WWW:\census.gov. Exhibit A is a description of a census designated place from the US Census Bureau. Exhibit B is a census break-out of the persons living in North Tunica, Mississippi. The data is provided from the University of Mississippi, in Oxford, Mississippi. The US Census Bureau and statistical data from the University of Mississippi depict a 1990 population in North Tunica of 1,314 persons as compared to 234 persons in Orville, Alabama, and an unacknowledged community in Gluckstadt, Mississippi. Therefore, North Tunica meets the community indicia required for an allotment of an FM channel.

PETITION SUMMARIZED

The petition for the allocation of channel 254A at North Tunica can be SUMMARIZED as follows:

<u>COMMUNITY</u>	<u>PRESENT</u>	<u>PROPOSED</u>
North Tunica	-----	254A

No substitutions of channels in other markets or interruption of service are necessary for this allocation. Since there are no channel deletions or substitutions necessary for the allocation of channel 254A at North Tunica, it can be allotted and applications for a construction permit filed immediately.

EXPRESSION OF INTEREST

FLINN hereby certifies that he is interested in the allocation of channel 254A at North Tunica and if the channel is allocated he, or an organization in which it participates, will timely file an application for construction permit. He further states that he, or an entity in which he is a participant, will construct and daily operate this station, if he is the successful applicant.

PETITIONER'S PREFERENCE

FLINN is aware that talk in the "trade" lately has hinted that the Commission may institute a procedure commonly known as "petitioner's preference or finder's preference." This practice would, in essence, give a petitioner a preference when an application window was opened for an allocation. If this rule is implemented

before the Commission takes action on the instant petition, FLINN respectfully requests a petitioner's preference.

CONCLUSION

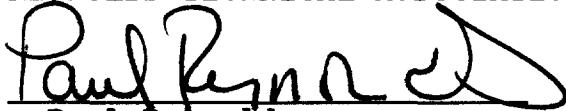

FLINN is petitioning the Commission to institute a Notice of Proposed Rule Making leading to the allocation of channel 254A at North Tunica, Mississippi, as that community's first local service. This channel is available for allocation immediately, as it requires no deletions and/or substitutions in other communities. In addition, the allocation will require a site restriction of 9.39 kilometers at 224.10° (southwest from the community of license). FLINN certifies that he, or an entity in which he participates, will apply for the license at North Tunica if the channel is allocated.

NOTICE

This petition for rule making was prepared by Reynolds Technical Associates. Any petitions for rule making using this format and not attesting to this declaration was not prepared by this firm

CERTIFICATION

I, Fred R. Flinn, Individually, the petitioner for the allotment of channel 254A at North Tunica, Mississippi, do hereby verify that the statements contained in this Petition for Rule Making are true and correct to the best of my knowledge and belief. I represent that this Petition is not filed for the purpose of impeding, obstructing or delaying determination on any other application or petition with which it may be in conflict.

Respectfully Submitted,

Fred R. Flinn

metropolitan and nonmetropolitan classification cuts across the other hierarchies; for example, there is generally both urban and rural territory within both metropolitan and nonmetropolitan areas.

To meet the needs of various users, the standards provide for a flexible structure of metropolitan definitions that classify an MA either as a metropolitan statistical area (MSA) or as a consolidated metropolitan statistical area (CMSA) that is divided into primary metropolitan statistical areas (PMSA's). Documentation of the MA standards and how they are applied is available from the Secretary, Federal Executive Committee on Metropolitan Areas, Population Division, U.S. Bureau of the Census, Washington, DC 20233.

Central City

In each MSA and CMSA, the largest place and, in some cases, additional places are designated as "central cities" under the official standards. A few PMSA's do not have central cities. The largest central city and, in some cases, up to two additional central cities are included in the title of the MA; there also are central cities that are not included in an MA title. An MA central city does not include any part of that city that extends outside the MA boundary.

Consolidated and Primary Metropolitan Statistical Area (CMSA and PMSA)

If an area that qualifies as an MA has more than one million persons, primary metropolitan statistical areas (PMSA's) may be defined within it. PMSA's consist of a large urbanized county or cluster of counties that demonstrates very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSA's are established, the larger area of which they are component parts is designated a consolidated metropolitan statistical area (CMSA).

Metropolitan Statistical Area (MSA)

Metropolitan statistical areas (MSA's) are relatively free-standing MA's and are not closely associated with other MA's. These areas typically are surrounded by nonmetropolitan counties.

Metropolitan Area Title and Code

The title of an MSA contains the name of its largest central city and up to two additional city names, provided that the additional places meet specified levels of population, employment, and commuting. Generally, a city with a population of 250,000 or more is in the title, regardless of other criteria.

The title of a PMSA may contain up to three place names, as determined above, or up to three county names, sequenced in order of population. A CMSA title also may include up to three names, the first of which generally is

the most populous central city in the area. The second name may be the first city or county name in the most populous remaining PMSA; the third name may be the first city or county name in the next most populous PMSA. A regional designation may be substituted for the second and/or third names in a CMSA title if such a designation is supported by local opinion and is deemed to be unambiguous and suitable by the Office of Management and Budget.

The titles for all MA's also contain the name of each State in which the area is located. Each metropolitan area is assigned a four-digit FIPS code, in alphabetical order nationwide. If the fourth digit of the code is a "2," it identifies a CMSA. Additionally, there is a separate set of two-digit codes for CMSA's, also assigned alphabetically.

OUTLYING AREAS OF THE UNITED STATES

The Census Bureau treats the outlying areas as the statistical equivalents of States for the 1990 census. The outlying areas are American Samoa, Guam, the Commonwealth of the Northern Mariana Islands (Northern Mariana Islands), Republic of Palau (Palau), Puerto Rico, and the Virgin Islands of the United States (Virgin Islands). Geographic definitions specific to each outlying area are shown in appendix A of the text in the data products for each area.

PLACE

Places, for the reporting of decennial census data, include census designated places and incorporated places. Each place is assigned a four-digit census code that is unique within State. Each place is also assigned a five-digit FIPS code that is unique within State. Both the census and FIPS codes are assigned based on alphabetical order within State. Consolidated cities (see below) are assigned a one-character alphabetical census code that is unique nationwide and a five-digit FIPS code that is unique within State.

Census Designated Place (CDP)

Census designated places (CDP's) are delineated for the decennial census as the statistical counterparts of incorporated places. CDP's comprise densely settled concentrations of population that are identifiable by name, but are not legally incorporated places. Their boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change with changes in the settlement pattern; a CDP with the same name as in previous censuses does not necessarily have the same boundaries.

AREA CLASSIFICATIONS

A-8

EXHIBIT A

Beginning with the 1950 census, the Census Bureau, in cooperation with State agencies and local census statistical areas committees, has identified and delineated boundaries for CDP's. In the 1990 census, the name of each such place is followed by "CDP." In the 1980 census, "(CDP)" was used; in 1970, 1960, and 1950 censuses, these places were identified by "(U)," meaning "unincorporated place."

To qualify as a CDP for the 1990 census, an unincorporated community must have met the following criteria:

1. In all States except Alaska and Hawaii, the Census Bureau uses three population size criteria to designate a CDP. These criteria are:
 - a. 1,000 or more persons if outside the boundaries of an urbanized area (UA) delineated for the 1980 census or a subsequent special census.
 - b. 2,500 or more persons if inside the boundaries of a UA delineated for the 1980 census or a subsequent special census.
 - c. 250 or more persons if outside the boundaries of a UA delineated for the 1980 census or a subsequent special census, and within the official boundaries of an American Indian reservation recognized for the 1990 census.
2. In Alaska, 25 or more persons if outside a UA, and 2,500 or more persons if inside a UA delineated for the 1980 census or a subsequent special census.
3. In Hawaii, 300 or more persons, regardless of whether the community is inside or outside a UA.

For the 1990 census, CDP's qualified on the basis of the population counts prepared for the 1990 Postcensus Local Review Program. Because these counts were subject to change, a few CDP's may have final population counts lower than the minimums shown above.

Hawaii is the only State with no incorporated places recognized by the Bureau of the Census. All places shown for Hawaii in the data products are CDP's. By agreement with the State of Hawaii, the Census Bureau does not show data separately for the city of Honolulu, which is coextensive with Honolulu County.

Consolidated City

A consolidated government is a unit of local government for which the functions of an incorporated place and its county or minor civil division (MCD) have merged. The legal aspects of this action may result in both the primary incorporated place and the county or MCD continuing to exist as legal entities, even though the county or MCD performs few or no governmental functions and has few or no elected officials. Where this occurs, and where one or more other incorporated places in the county or MCD

continue to function as separate governments, even though they have been included in the consolidated government, the primary incorporated place is referred to as a "consolidated city."

The data presentation for consolidated cities varies depending upon the geographic presentation. In hierarchical presentations, consolidated cities are not shown. These presentations include the semi-independent places and the "consolidated city (remainder)." Where the consolidated city is coextensive with a county or county subdivision, the data shown for those areas in hierarchical presentations are equivalent to those for the consolidated government.

For inventory geographic presentations, the consolidated city appears at the end of the listing of places. The data for the consolidated city include places that are part of the consolidated city. The "consolidated city (remainder)" is the portion of the consolidated government minus the semi-independent places, and is shown in alphabetical sequence with other places.

In summary presentations by size of place, the consolidated city is not included. The places semi-independent of consolidated cities are categorized by their size, as is the "consolidated city (remainder)."

Each consolidated city is assigned a one-character alphabetic census code. Each consolidated city also is assigned a five-digit FIPS code that is unique within State. The semi-independent places and the "consolidated city (remainder)" are assigned a four-digit census code and a five-digit FIPS place code that are unique within State. Both the census and FIPS codes are assigned based on alphabetical order within State.

Incorporated Place

Incorporated places recognized in 1990 census data products are those reported to the Census Bureau as legally in existence on January 1, 1990 under the laws of their respective States as cities, towns, and villages, with the following exceptions: the towns in the New England States, New York, and Wisconsin, and the boroughs in New York are recognized as minor civil divisions for census purposes; the boroughs in Alaska are county equivalents.

POPULATION OR HOUSING UNIT DENSITY

Population or housing unit density is computed by dividing the total population or housing units of a geographic unit (for example, United States, State, county, place) by its land area measured in square kilometers or square miles. Density is expressed as both "persons (or housing units) per square kilometer" and "persons (or housing units) per square mile" of land area in 1990 census printed reports.
